JURNAL 4

A. SOAL

1. Buatlah sebuah aplikasi **Flutter** dengan ketentuan berikut:
   - Tampilan layout sesuai contoh gambar yang diberikan.
   - Pada bagian bawah teks "**Riwayat Tes**", tampilkan sebuah **ListView** yang bersifat **dinamis**.
   - Data pada **ListView** dibuat dari sebuah **List of Map** yang kalian definisikan sendiri dengan minimal **18 data (setiap data memiliki 2 key)**.
   - Pastikan **ListView** dapat di-scroll secara independen, tanpa membuat seluruh tampilan aplikasi ikut ter-scroll.

Contoh Output:

B. JAWABAN

Deskripsi Program

Jadi..... program Flutter ini tuh intinya bikin halaman dasbor simpel buat ngecek status tes TOEFL kita. Di bagian paling atas kita nampilin foto profil lengkap sama nama dan NIM, terus di bawahnya kita bikin semacam card pakai efek warna gradient buat ngasih liat status kelulusan ("LULUS") sekalian sama rincian nilai per sesinya kayak Listening, Structure, dan Reading. Nah, buat sisa layarnya di bagian bawah, kita langsung pake ListView.separated buat nge-loop data list riwayat tes kita sebelumnya (tanggal dan nilai), jadi daftarnya bisa di-scroll dengan mulus dan keliatan rapi karena ada garis pemisahnya di tiap baris.

sekian, terima nilai 100 :>
